

Dear Mitch,

It has been about 6 months now that your company put in the new system and air filtration system. We have noticed a difference in Jacob.

He has fewer runny noses.

He has not needed a breathing treatment unless he was sick.

The air flow through the house is much improved and we have enjoyed not having the window unit in our TV room.

I was not quite sure if I would be able to tell a difference to justify the cost but now I can say it was well worth every penny we paid for it. Just the difference in Jacob's asthma systems is worth it. Myself being a nurse, anything to help my son's asthma without more medication is great.

I also want to let you know the service after the sale has been great. I can come by or call and there is someone out that day and always so helpful.

Thanks again for making our home a more comfortable and healthier place to be.

Thanks again,

Charity Brees, RN
